Developer:  
Alphaquest Games Studio  
Publisher:  
Alphaquest Games Studio  
Release Date: 6 Apr, 2018

a09c17d780

English,German,Portuguese

---

Loaded with grammatical errors, the english translation is literally missing for several fish and furniture names. Horrid soundtrack, it seems to be some public domain new age techno weirdness. The fishing minigame is painful, unless you're trying to hook a basic starter fish you need the hand eye coordination of Iron Man to have any chance of catching the damned things and keeping the three sliders happy. Several fishing locations aren't even in the game yet, just listed as Coming Soon.

For a full release, even the 60% off I paid was too much. Hello refund.. This is one of the best games I've ever played, I can't tell you what exactly got me playing but, I love the grinding part of the game I placed my fishing boats strategically and I tried to figure out how to capture legendary fishes. While doing these things I bought myself high-end luxury boats, legendary rod, too many expensive furniture for my yacht. (btw, if you think this game is online by looking at the steam photos, they are your own fishing boats that you place on sea to generate money/fish in a time period. I mean game is not online (for now maybe)). This game is great. I'm confused as to why I seem to be seeing so many negative reviews. To be fair as fun as this game is, I think it is a little overpriced. I realize that the devs are planning on adding more content, but if they do I don't recommend making the players pay for it. In spite of the price this game is really fun and I would recommend to many other players.
